

DJ 310

Indiana Line – a brand with traditions

Indiana Line is an Italian brand famous for producing loudspeakers and installation speakers. It has been present on the market since 1977. The optimized production process, combined with the rational use of components, distinguish this brand from competitive solutions with above-average quality of workmanship and sound.

DJ – unleash good sound energy

The efficient and energetic Indiana Line models from the DJ series impress with their beautiful old-school design, relating to the good old 80s of the last century. They have a black ash vinyl finish. Just connect your speakers to an amplifier to get the best out of them – modern, powerful and clear sound.

Power in the quality of components

The DJ 310 is a 3-way loudspeaker with a 275 mm woofer and a 135 mm midrange driver with a phase corrector. The whole thing is completed by a tweeter with a neodymium magnet, a radial rear chamber and a silk dome, supported by a special waveguide. What's more, the loudspeakers have been equipped with high-quality crossovers and speaker terminals. The DJ 310 model with the powerful energy flowing from the large woofer guarantees a full, physical bass feeling. The midrange driver in combination with the tweeter can fill even a large space with sound.

Choose the perfect parameters

Indiana Line DJ 310 is a design with amplifier loading impedance between 4 – 8 ohms and distinguished by high voltage sensitivity of 94 dB (2,83 V / 1 m). The power of the amplifier used to drive this loudspeaker should be from 30 to 160 W. The Indiana Line DJ 310 model is recommended for rooms with a large space, as a perfect solution for playing music, for example in a dance school or gym.

The most important features of the DJ 310 model:

- 3-way acoustical design
- Crossover frequencies: 500 Hz and 4 kHz
- 275 mm woofer
- 135 mm midrange driver
- 26 mm textile dome tweeter
- Bass reflex cabinet with two ports at the front
- Frequency response: 38 Hz to 22 kHz
- Finish: black ash
- Suggested amplifier power: 30 – 160 W
- Sensitivity: 94 dB (2,8 V / 1 m)
- Dimensions (H x W x D): 620 x 295 x 320 mm
- Weight: 14,1 kg
