

DIVA 6

The sound momentum

Three-way, triple-woofer speaker system

indiana line

Get the sound momentum

Be surprised by the unexpected scale of sound coming from these sleek loudspeakers. Individually crafted Curv membranes, proprietary Dual-Wave surround, triple bass drivers in aluminum cast baskets, and a reinforced cabinet with a thick, tilted front panel are just some of the solutions that make these speakers exceptional. Diva 6 will charm you with striking dynamics, refined tonality and one-of-a-kind airy trebles, regardless of what music you like and what electronics you have.

Tweeter with a radial chamber and a profiled front

Saturates the room with high tones, ensures clear treble without coloration.

Dual-Wave upper suspension

Prevents membrane resonance, reduces bass distortion.

Curv membrane

Faithfully and naturally reproduces details, optimally dampens internal resonances.

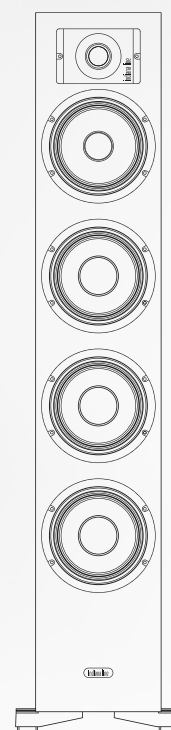

Triple long-throw bass drivers

Thoroughly optimized set of high-BL woofers delivers unprecedented bass dynamics.

Strong enclosure

30-thick, tilted front panel with multiple internal braces prevent vibrations of the cabinet.

Two finish options:

DIVA 6

system		3-way
bass alignment / port placement		bass-reflex / bottom
suggested amplifier	W	30-160
suggested room size	sqm	16-30
impedance	Ohm	4-8
frequency response	Hz	35-23000
sensitivity (2.83 V / 1 m)	dB	92
low-frequency transducers (diameter)	mm	3 * 150
mid-frequency transducer (diameter)	mm	150
high-frequency transducer (diameter)	mm	26
crossover frequency	Hz	300 / 3000
dimensions (height x width x depth)	mm	957 × 220 × 335
weight (1 piece)	kg	18.5
